Technical specifications

Name	Thermo jug 2,5L with pump system
Art. no.:	190125
Construction:	With pump cover latch
Material:	Stainless steel reservoir; Cover, pump and handle from artificial materials (black)
Capacity:	2.5 litres
Dimensions:	Ø 160 mm, H 330 mm
Weight:	1.4 kg

Properties:

- Well-isolated two-layer casing;
- Perfect portions owing to smooth pump mechanism;
- Easy to use;
- Safe transport owing to fold-in handle and pump cover latch.

Tips and advice

NOTE!

Wash thoroughly thermo jug and pump with hot water and a mild cleaning agent prior to each use.

- Filling the thermo jug is simple. Open the pump cover while pressing the buttons on the pump head, then raise the cover.
- Remove the pump tube and fill the thermo jug with the desired amount of hot or cold liquid. Replace the tube and close the cover until the buttons click into place.
- To pour drinks from the thermo jug, open the latch on the pump cover by sliding it to the left (**OPEN**).
- Place a cup/glass or other container under the pump head and press down on the cover. The pump mechanism will begin to function. Press and hold until the container contains the desired amount of beverage.
- Close the pump latch by sliding it to the right (**CLOSE**).

- In order for drinks in the thermo jug to remain at a constant temperature, it is advisable to preheat the thermo jug or in the case of cold drinks to cool the thermo jug. To ensure best results, depending on the type of beverage fill the thermo jug first with a small amount of hot or cold water and swirl around or leave in the thermo jug for a time prior to filling it with the desired beverage.
- Do not fill the thermo jug with fizzy drinks or baby formula, as bacteria can grow.
- If coffee was in the thermo jug, wash it thoroughly prior to filling with another beverage in order to avoid any unwanted aftertastes.

Cleaning

- Remove the thermo jug cover only for cleaning. Open the cover using the buttons on the pump head.
- Press the connecting mechanism on the center of the cover connector and remove the cover.

- Clean the cover with warm water and a mild cleaning agent.
- Clean the thermo jug and pump tube after each use with warm water and a mild cleaning agent.
- Wipe the outside of the thermo jug with a soft, moist cloth.
- Hard water may leave calcium deposits in the thermo jug. Coffee generally dyes the interior and leaves a brown residue. To remove such deposits, use commercially available substances.
- Rinse the thermo jug thoroughly and **several times**, then leave open to dry.
- **Never** use harsh chemicals which may scratch the thermo jug.
- Replace the cover following cleaning.
- **Never** wash the thermo jug in the dishwasher.
- **Never** immerse the thermo jug in water.
- **Never** use scouring agents to clean the thermo jug.
- Use only a soft cloth and never use any type of harsh chemicals which may damage the stainless steel casing.
