

## Vacuum machine 100

### Description

### Features

|                            |                                                                                                                          |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------|
| • Power load:              | 0,13 kW   220-240 V   50 Hz                                                                                              |
| • Control unit:            | Electronic<br>Knob                                                                                                       |
| • Control lamp:            | yes                                                                                                                      |
| • Digital display:         | No                                                                                                                       |
| • Lighting:                | -                                                                                                                        |
| • Colour:                  | White                                                                                                                    |
| • Number of welded joints: | 1                                                                                                                        |
| • Length welding rod:      | 300 mm                                                                                                                   |
| • Vacuum pump:             | approx. 12 L / min. (0.72 m³ / hours)                                                                                    |
| • Vacuum control:          | Electronic                                                                                                               |
| • Including:               | 1 vacuuming film roll (20 cm x 3 m)<br>1 vacuuming film roll (30 cm x 3 m)<br>1 connecting hose (for external vacuuming) |
| • Properties:              | Integrated blade                                                                                                         |
| • Functions:               | Combined vacuuming and sealing                                                                                           |
| • Material:                | Plastic                                                                                                                  |

## Vacuum machine 100

- Important information:
  - ON/OFF switch: No
  - Vacuuming intensity can be regulated: 2 levels
  - Maximum vacuum: 860 mbar
  - Welding duration can be regulated: yes
  - Size: W 400 x D 185 x H 100 mm
  - Weight: 2.8 kg

## Vacuum machine 100

### Add on Products

#### Vacuum sealer roll set 220

- Set comprises: 2 vacuum film rolls
- Width roll: 22 cm
- Important information: -
- Length roll: 5 m
- Sous-Vide suitable: Yes
- Size: W 220 x D 40 x H 40 mm
- Weight: 0.46 kg

Code-No. 300418  
GTIN 4015613474946

#### Vacuum container

- Content: 1,5 litre(s)
- Stackable: Yes
- Colour: Transparent
- Material: White Plastic
- Important information: -
- Size: W 135 x D 135 x H 180 mm

Code-No. 300422  
GTIN 4015613632445

#### Vacuum sealer roll set 280

- Set comprises: 2 vacuum film rolls
- Width roll: 28 cm
- Important information: -
- Length roll: 5 m
- Sous-Vide suitable: Yes
- Size: W 50 x D 280 x H 50 mm
- Weight: 0.51 kg

Code-No. 300419  
GTIN 4015613474953
